- ✓ Available in 22 Finishes

Applications

The **Model ATV-4 Automatic Toilet Flush Valve** is designed for commercial and industrial installations requiring longevity, reliability, and zero down time. Constructed with heavy-duty materials, the ATV-4 is engineered for long service life in highuse environments.

The ATV-4 is part of MAC Faucets new EvrLast product line. EvrLast products have a life expectancy measured in decades, not years. ***Almost*** every part that ***might*** become defective over time, including batteries, is housed in one easy to replace, high-reliability, all-in-one cartridge assembly. No diagnostics or guess work is needed. *It takes a layman less than 3 minutes to replace the cartridge, and there's no need to turn off the water.*

Flush volume and sensor distance is remote control adjusted.
